

OUR CLEANING SERVICES

TANK CLEANING AND EFTCO-APPROVED TANK CLEANING FACILITY

We offer internal cleaning/washing and technical cleaning of tankers, silo trucks, tank containers, and accessories. After washing and/or cleaning, an EFTCO-approved cleaning certificate can be issued, and the tank truck can be sealed.

WASHING PLANTS

We offer external brush washing with modern washing facilities. We have specific quick wash programs, as well as manual washing for special vehicles, such as tankers/silo trucks, refrigerated/freezer trucks, tarpaulin trucks, container trucks, and construction equipment, among others. Additionally, we wash vans and flatbed trucks and provide complete inspection washing.

As an additional service, we offer pressure testing of discharge/hydraulic hoses using an approved pressure testing bench, with the opportunity of pressure testing with air or water, followed by certification.

ENVIRONMENTAL FOCUS

We focus on the environment and continuously develop our facilities according to the latest regulations. The facility separates, recycles, and purifies a large portion of the detergents, chemicals, and water used. We maintain close dialogue with environmental authorities and hold certifications for both ISO 9001 and 14001. In addition, the cleaning facility is SQAS and EFTCO certified.
